

Quadro Pressure Filters

Quadro has designed an affordable alternative to the other pressure filters on the market, offering simple and practical operation while still maintaining an affordable price.

We have been providing refurbishment and AS1210 certification for our clients' existing fleet of pressure filters since 2016. In doing so we identified the need for design improvements by eliminating the bottom screw handle while still providing a competitively priced product.

Quadro is proud to offer our latest Australian designed and manufactured product to you. Fabricated from heavy duty S/S316 for maximum life span and corrosion resistance.

When the top plate is raised the barrel can be quickly separated from the base and rotated out allowing for easy clean out and sample preparation. The unique swinging top plate allows the barrel to be filled quickly and cleanly.

| | |
|------------------------|---------------------|
| DESIGN PRESSURE | 900kpa |
| VOLUME | 13L |
| STANDARD | AS1210-2010 CLASS 3 |
| MATERIAL | S/S 316 |
| WEIGHT DRY | 80KG |
| HAZARD LEVEL | E (AS4343-2014) |
